

Tactical Antenna Field Portable Antenna Kit

MODELS: FPAK-1-CEL, FPAK-1-700

ASSEMBLY CONSIDERATIONS

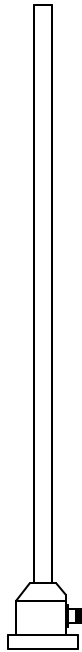

This instruction set will guide you through the proper set up of the antenna included in your F.P.A.K.

STAND ALONE

The antenna has a magnetic base and can be used as a stand-alone system mounted on a metal surface, for indoor operation. This antenna can be used with an optional tri-pod. (see pg 2)

Note: *This antenna does not require tools of any kind in the set-up. All operations are to be performed by hand. This antenna requires no adjustment.*

1. Connect the cable to the port at the base of the antenna. Place the antenna in its operating position.
2. When the antenna is suspended from a ceiling, tape off the cable approximately six inches from the antenna base to prevent the antenna from being pulled down.

USED WITH OPTIONAL TRI-POD

Simply un-pack the tri-pod and thread the antenna base to the tri-pod threads.
